MANIFATTURA EMILIANA
FROM ME TO YOU

naturae^{2.1}

LINEE NATURALI

Linee morbide per arredare lo spazio
con dettagli naturali e luminosi.

Una trama di disegni ricavata dalla pietra reale.

NATURAL LINES

Soft lines to furnish spaces
with natural and bright details.

A weaving of drawings inspired by real stone.

CARATTERISTICHE TECNICHE/TECHNICAL FEATURES

	Caratteristiche tecniche Technical specification	Norma Regulation	naturae NATURALE
	Spessore Thickness	UNI EN ISO 10545-2	10 mm
	Resistenza al gelo Frost resistance	UNI EN ISO 10545-2 ASTM c1026	Ingelivo Frost proof
	Assorbimento d'acqua Water Absorption	UNI EN ISO 10545-3 ASTM c373	≤ 0,5%
	Resist. all'abrasione profonda Resistance to abrasion	UNI EN ISO 10545-7	PEI DA III A V
	Resistenza ai prodotti chimici Chemical resistance	UNI EN ISO 10545-13 ASTM c650	GA GLA GWA
	Resistenza alle macchie Resistance to stains	UNI EN ISO 10545-14	5 Stain Removed
	Resistenza allo scivolamento Slip resistance	ASTM c1028 DIN 51130	WET 0,61 DRY 0,76 R9
	Durezza mohs Hardness in mohs degrees	UNI EN 101 - 1992	5

POSA IN OPERA - RETTIFICATO

Si consiglia di posare il materiale rettificato con opportuna fuga (minimo 2 mm), facendo uso delle crocette distanziatrici; nei grandi ambienti, prevedere l'inserimento dei giunti di dilatazione. I criteri di posa devono essere conformi alla destinazione d'uso del pavimento. La posa può essere fatta sia con collanti che con malta cementizia.

Nel caso di posa a collanti, la superficie deve essere perfettamente planare, e predisposta per il buon ancoraggio delle piastrelle. Per la scelta dell'adesivo e per la sua applicazione attenersi scrupolosamente alle indicazioni della casa produttrice. Posare le piastrelle prendendole da più scatole in modo da miscelarle. Per segnare eventuali tagli delle piastrelle non utilizzare pennarelli, soprattutto se di tipo indelebile.

TILING - RECTIFIED

We recommend that an adequate joint is always left between the tiles (minimum 2 mm), using spacers; provide for expansion joints for large surfaces. The tiling criteria must comply with the intended use of the flooring. The tiles can be laid with either adhesives or cement-based mortar. If adhesives are to be used, the surface must be perfectly level and prepared to ensure the tiles will be correctly anchored. Follow the manufacturer's recommendations scrupulously regarding the choice and application of the adhesive. When tiling, remember to take tiles from several boxes in order to mix them. Do not use marker pens to mark where tiles are to be cut, especially if they are permanent markers.
